

ALHASAN ALQAYSI

Full-stack Web Developer & Lifelong Learner

I have started my programming journey by learning the C language. Now my skill-set includes Node.js, React, jQuery, Git, SQL, and NoSQL databases. JavaScript, its frameworks and libraries, are so far parts of my preference stack. I am a self-taught developer, who understands the dynamics of the world toward digitalization and who doesn't want to "miss the train". Landing an entry-level job in software development would let me strengthen my skills and kick-start my career.

PROFESSIONAL SKILLS

- JavaScript
- React
- Node.js
- MongoDB
- HTML, CSS, SQL, Express.js, Docker

PERSONAL SKILLS

- Responsible and communicable.
Team player - know my way around Git. Positive "can-do" attitude and constant learning spirit.
- **Languages:** English, Finnish

ACHIEVEMENTS

Junction 2021

Team project for Elisa's challenge

- Successfully completed the project that visualized in a creative and clear to the end-user way the key insights and decision-driving metrics from datasets provided by Elisa.

EXPERIENCE

Solo and Group Projects

- Sep 2020 - present
- E-commerce project to sell GPS trackers for lost keys
- Portfolio website development (My-site)
- Social app that connects bikers with each other (TinBike)
- Domino game development
- Drum kit game development
- Web calculator development

EDUCATION BACKGROUND

Integrify

- Software Development Academy | Jun 2020-January 2022

B.ENG. IN IT HARDWARE

- University of Baghdad | January 2011-January 2015

Self Studies

- Computer Software Engineering | August 2020-Present
- Learning the skills needed to develop and maintain software applications. Participation in code camps, in-person mentor and acceleration programs, doing online courses related to programming and IT.
